

Operational Readiness Workshop

Consultant / Trainer

Han Gesink

The **Petrogenium**. Operations Readiness Workshop is a customized, high intensity workshop for owner's representatives (i.e. the future Operator of a facility), the Commissioning and Start Up team, but also Engineering and Construction contractors aimed to ensure the transition from a project to operations is achieved without any flaws.

Participants

Although many **Petrogenium**. courses can be tailored for awareness/inexperienced staff, for intermediate and for experienced personnel, this workshop is specifically for leadership & senior contractors and will be customized for a specific refinery, plant or unit. The option for post-course consultancy/help-desk support is also available. Participants may include: Senior Staff and professionals, members of the site leadership team but also Managing (Engineering & Construction) contractors.

Learning Objectives

- Critical involvement of the Owner/Operator in all phases of the Project, from the definition phase to Commissioning/Start Up (CSU) and Production
- Engagement between Engineering and Construction contractors for both preparation of Commissioning, Start Up and Production
- Mitigation of risks to successful CSU / key success areas

Major Deliverables of the workshop are:

- In depth understanding of requirements to bring the project to operations
- Development of plans (as appropriate) to ensure a start-up without surprises
- Methods to mitigate risks to successful commission and start up, critical owner involvement in all project phases.

Programme

Typically, the workshop programme will take 2 to 3 days and will be developed jointly with the Customer to tailor it to the specific needs and character of the project.

Why select Petrogenium.?

The above support will be provided by principal consultants with 30+ years world-class experience in the technology and hands-on know-how from operation of refinery units.
