Petrogenium. Academy

Performance Improvement

Reliability Accelerator 3 Day Masterclass

Consultant / Trainer **Gregor Jenzer**

A results-driven masterclass that gives engineers and leaders practical calculators, checklists and case-based clinics to raise plant availability and lower maintenance cost. Real refinery examples, structured group work and step-by-step templates mean every concept can be applied immediately on return to site.

Participants

Maintenance, Operations, Process, Projects, Turnaround, Supply-Chain, HSE and Finance personnel, from front-line supervisors to senior managers.

No statistics background required; every tool is demonstrated with straightforward spreadsheets and plant data.

Learning Objectives

Participants will be able to

- Build a defensible business case for reliability investment.
- Match failure patterns to the right maintenance policy and inspection interval.
- Facilitate an RCM-Lite review and upload resulting tasks to CMMS.
- Identify "bad actors" with Pareto and root-cause dashboards.
- Embed actions in threats & opportunity registers, RBI/SIP programmes, TAR scope and the AMP.

Programme

DAY 1

Foundations & Values

- · Reliability economics & KPI scorecard
- Failure patterns, P-F curve and concise Weibull demonstration
- Maintenance-policy workshop (RTF / PM / CBM)
- Integration with threat & opportunity management process

DAY 2

Analysis & Strategy

- RCM-Lite walk-through on a client system
- Risk-Based Inspection (RBI) and Integrity Windows (SIP / IPF)
- Spares-optimisation overview and risk-ranking clinic

DAY 3

Improvement & Integration

- · Root-Cause and Causal-Learning toolkit; "bad actor" Pareto exercise
- Converting actions to CMMS tasks and performance KPIs
- Turnaround scope alignment and AMP roadmap
- · Personal action plans and executive report-out

Why select Petrogenium.?

operation of refinery units.

The above support will be provided by principal consultants with 30+ years world-class experience in the technology and hands-on know-how from
