

Glacial Geology

Consultant / Trainer

David Alsop

The **Petrogenium** (in collaboration with EPTS) **Glacial Geology** course explains the basics of glacial geology and looks at the sedimentological processes that occur.

Participants

This **Petrogenium**. course is aimed at Petroleum geologists.

Learning Objectives

This course explains the basics of glacial geology and looks at the sedimentological processes that occur. The final day focuses on how to explore in glacial settings, development of glacial reservoirs and the impact on production.

Programme

4 DAY TRAINING

- Basics of glacial geology
- Glaciations over time
- Glacial Processes
- Glacial reservoirs
- Key barriers and baffles and architecture
- Reservoir Properties
- Correlating in glacial systems
- Impacts on exploration, field development and production

Why select Petrogenium.?

The above support will be provided by principal consultants with 30+ years world-class experience in the technology and hands-on know-how from operation of refinery units.
